

C4
B2
promoter region.

80. ~~The intron of claim 79 wherein the enhanced promoter region is derived from a subclone of human cytomegalovirus (Towne strain).--~~

Remarks

The preliminary amendment provided herewith is presented in order to better define what applicants believe to be preferred embodiments of their claimed invention. Support for the new claims can be found at page 48, lines 15-19; page 57, line 6 to page 58, line 7 and Figure 29. Accordingly, no new subject matter has been added to the application by way of the new claims.

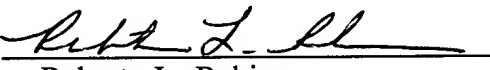

Applicants are also providing the deposit information that was missing from the application as originally filed.

Entry of the above amendments to the specification and claims and early examination thereof are respectfully requested.

Please direct all further communications in this application to:
